

June 2016

PASSIVE VEHICLE SECURITY SYSTEMS

DISCLAIMER: This list is compiled as a guide only. Actual physical confirmation of a system in a vehicle is strongly recommended. There may be more vehicles other than those listed above which are equipped. This data may not account for mid-year introductions of transponder systems. Data insufficient for Aston-Martin, Ferrari, Lamborghini, Lotus, other exotics. We reserve the right to change any information on this list, and disclaim any liability for damage or wrongful action resulting from the use of the list.

- T** = Transponder immobilizer system: system must detect proper transponder value from chip in key in order to start engine
V = VATS/PASS-Key II system: system must detect proper resistance value in key in order to start engine
P = Passlock system: system must detect proper R-code within ignition lock (or ignition switch) to start engine. Does NOT have chip in key

ACURA

- T** CL series (98-03)
T ILX (ALL)
